Change Management Certification Program

Lead change, distraction-free

A hands-on program where you learn through real projects.

- Team participation is welcome, and you'll gain practical outputs that can be immediately applied in the field.
- The program includes accommodation and meals, offering a calm and focused environment for learning.

This interactive three-day learning experience equips participants with the knowledge, skills, and tools needed to lead successful change initiatives. During the program, participants apply Prosci's comprehensive change management methodology to a current project of their own. By the end of the program, they will have created a draft change management plan designed to improve project outcomes.

Upon completion, participants will earn a Prosci Change Management Certification.
